Welcome!

About NSLA

NSLA is a national, non-profit organization focused on the powerful impact of one achievable goal: investing in summer learning to help close the achievement gap. NSLA uses the power of research, advocacy, training, and policy to transform America's neighborhoods and communities, one child at a time.

Our work is based on the simple idea that summer—a time that is easily overlooked yet critical to educational development—is bursting with possibility, and instrumental in closing the achievement gap between privileged children and our most vulnerable children.

Why Summers Matter

Summer is the time of greatest inequity for young people. When schools are closed, many low income young people lack access to meals, books and other learning resources, and physical activity.

EDC at a Glance

Education Development Center, Inc. (EDC), is a global nonprofit that advances lasting solutions to improve education, promote health, and expand economic opportunity. Since 1958, we have been a leader in designing, implementing, and evaluating powerful and innovative programs in more than 80 countries around the world.

EDC was founded by MIT scholars and researchers.

200+ projects managed annually by EDC.

EDC has 1,300 employees.

**Out-of-School Learning (NCASE)
Online Learning Design and Facilitation**

Funders include USAID, NSF, NIH, MasterCard Foundation, DoEd, and SAMHSA

GLOBAL REACH

EDC has worked in more than 80 countries and in all 50 states in the U.S.

REGIONS

- » Africa
- » Asia
- » Europe
- » Latin America and the Caribbean
- » Middle East
- » United States

One of the hallmarks of a high-quality summer program is the way in which it creates a “summer culture” that is different from the school year and promotes a sense of community...

SUMMER CULTURE

How can summer programs maintain a feeling of community and facilitate learning in a way that will keep kids engaged, *even at a distance*?

Communication Tips

| Human Infrastructure | Consistency | Variety of Vehicles | Interpersonal Communication |
|---|--|--|--|
| <p>Online is <i>not</i> just about technology; the teacher/facilitator/counselor is the most critical element</p> <p>Presence is about personality ~ be yourself, always!</p> | <p>Establish patterns immediately for how, when, and where you will communicate</p> <p>Key information should go to all audiences (students, parents, staff)</p> | <p>Communicate key information multiple times via different channels</p> <p>Website, email, calendar, opt-in text messages</p> | <p>An informal and social tone is needed - professional AND personal</p> <p>Empathy</p> <p>Make time and process for individual <i>and</i> group check-ins</p> |

Facilitation of Learning

| Needs Sensing | Connect Contributions | Retain your Culture | Differentiate Instruction |
|--|---|---|---|
| <p>Establish formal and informal ways to regularly assess learner needs</p> <p>Surveys, staff meetings, check-ins with learners, parent feedback</p> | <p>Recognize learner contributions and specifically move community forward by connecting individual ideas and actions</p> | <p>Stay true to the culture of your in-person summer experience - this will drive engagement</p> <p>Why do campers come to your camp? Why do they return each year? What are your traditions?</p> | <p>Ensure variety to your daily activity flow (synchronous vs. asynchronous, large group vs. collaborative activities)</p> <p>Align time segments to activities and ensure variety of lengths</p> |

Facilitating the Move Online

⊕ Remember the power of collective intelligence: involve staff in planning

⊕ Can you make a game out of it?

⊕ Maintain an element of surprise throughout each day

⊕ Learning is a social experience: how can you design for collaboration?

THANK YOU!

Kirsten Peterson

The Art of Teaching Online

Technology

Zoe Baptista, MEd

Brandeis
UNIVERSITY

Technology

1. Learn about the **three key technology platforms** you need to have in place to support your online trainings.
1. Hear best practices and techniques for **setting up and using these technology platforms** so you can set up your trainings for success.

Note: Your team will need to review your specific training situation and your specific technology needs, so you can **choose the three platforms that will work best for you and your students.**

Technology

Online Meeting Platform (i.e. Zoom, Go To Meeting, Adobe Connect, etc.)

Practice and Test Everything

Get comfortable using the online meeting platform features and test everything

Keep it Simple

Keep the technology simple to start off and add more complexity later

Have a Co-facilitator

Work with a co-facilitator or assistant to make your trainings more effective

Accept Glitches

Assume things will go wrong with the technology and have a backup plan

Orient Students to the Technology

Walk students through your virtual classroom and show them the features

Technology

Content Management System or CMS (i.e. Moodle, Blackboard, or a Website)

Practice and Test Everything

Get comfortable using the learning management system (LMS) and test everything

Keep it Simple

Keep the technology simple to start off and add more complexity later

Ensure Equity Online

Make sure PDFs are screen reader ready and all videos include closed captioning

Make it Mobile Responsive

Test your online materials to make sure they are accessible on smartphones and tablets

Technology

Online Group Communication Platform (i.e. email, listserv, Slack, Piazza)

Practice and Test Everything

Get comfortable using the online group communication platform and test everything

Keep it Simple

Keep the technology simple to start off and add more complexity later

Orient Students to the Technology

Make sure everyone knows how to use the communication platform you choose for the group

Thank You!

7 Tips for Effective Remote Learning

Introductions

Dan Tieu

What we will cover today:

- ***Tips and best practices for remote teaching and learning***
 - We're here to support teachers and students as they navigate this new experience
 - We'll try to provide clear, actionable steps using Khan Academy where possible

What we will **NOT** cover today:

- ***Account setup or how to get started***
 - This webinar will not walk through how to set up an account and get started if you are new to Khan Academy
 - [Khan Academy for Remote Learning Quickstart Guide](#)

Why use Khan Academy for remote learning?

- **Khan Academy is built to serve learners *anytime***
 - You can assign specific skills to practice, with a clear deadline
 - Students complete the practice and get instant feedback
 - You keep track of student progress, even when you're not together

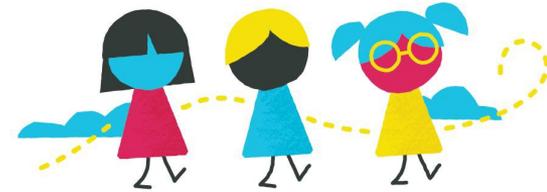

- **Khan Academy is built to serve learners *anywhere***
 - No computer is required - students can access it on smartphones
 - Our content is available in over [40 languages](#), **all for free!**

1. Adapt your communication skills

Now, more than ever, students need consistent communication with teachers

- **If you and your student can connect live, do it!**
 - Free tools like Hangouts Meet allow teachers to give live video lessons, and record them for students to watch later
- **Let students know you're thinking of them**
 - Send a note via email or an app like ClassDojo
 - Tell them what you're missing about seeing them in person, and how excited you will be to see them again soon!
- **Please provide feedback!**
 - Students are looking to you to let them know how they are doing, and that this work has purpose

How can you support communication between students and with their families?

- **Collaboration at a distance**

- Tools like Google Docs and Slides allow students to collaborate and communicate (in real time!) around shared problems and ideas

- **Communicate with the community**

- Parents and families are working remotely too!
- If possible, try and reach out to one (or more!) family per week to share something their student is doing well
- Don't hesitate to let parents/guardians know you appreciate them for supporting their child's remote learning

Reach out to other teachers and school staff

- **We are stronger together**
 - Other teachers - colleagues and friends - are going through this transition as well
 - Use some of the same tools you use with students to connect with other teachers

2. Choose the best tools (and stay with them)

Choose the tools that are best for you and your students.

- **Keep using whatworks**

- Are there digital tools you've been using in class all year like [Khan Academy](#)? Great, keep using them!

- **For new tools, pick what fits you and your students best**

- No one knows your class better than you, use what works best for you and your students and stick with it

- **Do not switch to new tools every day/week**

- Students should be spending time learning new concepts, not new tools

3. Keep a schedule

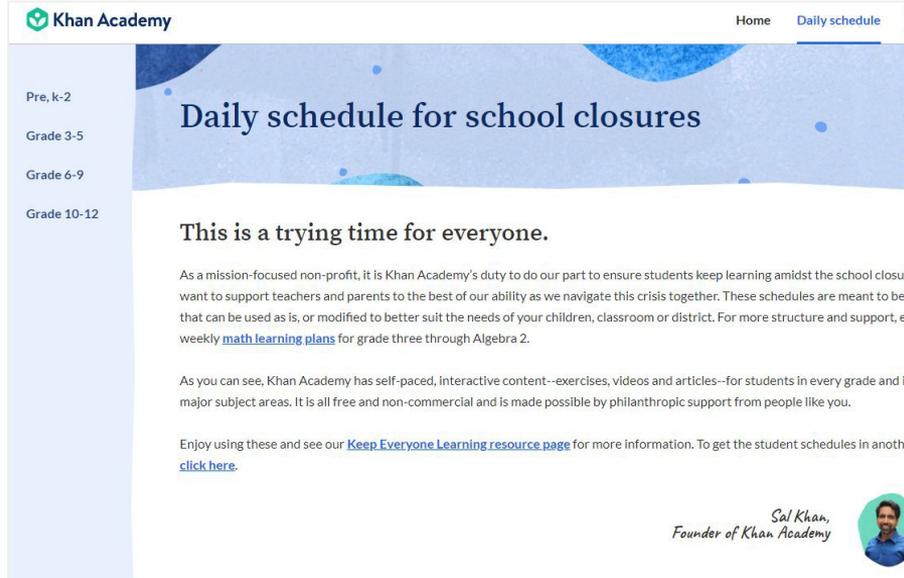

Keeping a schedule easier said than done

- **Stick to consistent times for working and connecting with students**
 - Provides consistency for you and your students
 - Schedules are not just for students
 - Determine specific times to lesson plan, connect with students, etc.
- **Looking for examples? We've got you covered:**
 - keeplearning.khanacademy.org/daily-schedule

Khan Academy schedules for school closures

The screenshot shows the Khan Academy website with a navigation bar at the top containing 'Home' and 'Daily schedule'. On the left is a sidebar menu with 'Pre, k-2', 'Grade 3-5', 'Grade 6-9', and 'Grade 10-12'. The main content area has a blue header with the title 'Daily schedule for school closures'. Below the title is the text 'This is a trying time for everyone.' followed by two paragraphs of introductory text. The first paragraph explains Khan Academy's mission and mentions 'math learning plans'. The second paragraph describes the self-paced content. A link 'Keep Everyone Learning resource page' is provided. At the bottom right, there is a quote from Sal Khan, Founder of Khan Academy, next to a small circular portrait of him.

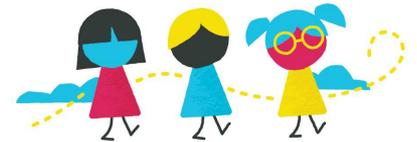

| | | |
|-------------------|--|---|
| 10:30am - 11am | Silent reading. Curl up with a favorite book or magazine. Here is a great list of titles that you might want to get your hands on. |  |
| 11am - 11:20am | Break/walk/play. Try to get that heart pumping again! | |
| 11:20am - 11:40am | Khan Academy Grammar | |
| | Recommend starting by taking the course challenge a few times to figure out what you know and don't know. | |

4. Support independent learning

Encourage students to master new skills

- **Students can use this time to fill gaps, move ahead or learn something new**
 - Using Khan Academy's mastery system you can help students set mastery goals below, on or above grade level and students can move at their own pace
 - Some teachers even encourage students to find courses that excite them outside their subject area

Course mastery placement

Here's what your students are currently working on. You can assign multiple goals, or change an existing goal, and it'll show up here.

Create goal

| COURSE MASTERY GOAL | STUDENTS | DUE DATE | |
|--------------------------------------|---|--------------|-----------|
| 3rd grade | Jones, Aaliyah | Jun 10, 2020 | Actions ▾ |
| 6th grade | Davis, Torrance | Jan 21, 2019 | Actions ▾ |
| 6th grade (Illustrative Mathematics) | Chen, Duo Davis, Torrance Hill, Kelli Jones, Aaliyah Kelly, Kiara Lee, Jasmine Leroy, Celine Lim, Kareem | Jun 8, 2019 | Actions ▾ |

5. Motivate your students

Staying motivated is hard

- **Set clear goals (and include students in the process!)**
 - Have students set individual or class goals for working remotely
 - Communicate goals with students and families
 - [More information on using Khan Academy's mastery goals](#)
- **Recognize milestones**
 - Try sharing a celebratory video or a virtual certificate of achievement for students who have shown progress or growth this week
 - You'll find some [Khan Academy certificates here](#)

6. Recognize the emotional impact

Remote learning is about more than just curriculum

- **Provide students an opportunity to reflect**
 - Try switching out an assignment with an opportunity for students to write and reflect on their remote learning experience
 - Some teachers encourage using a tool like Google Docs for students to share reflections and leave supportive comments for their peers
- **Express gratitude**
 - Brief emails or tools like ClassDojo encourage teachers and students to send messages of appreciation digitally

Remote learning is about more than curriculum (for teachers too!)

- **Be honest - with students and yourself**
 - This is A LOT to take in all at once
 - Share your experience with students, and let them know it's ok to struggle with a new tool or a new concept

7. Cut yourself and your students a break

Any questions?

Reach out to our [Help Center](#)
